

An entire system of care committed to providing compassionate, family-centered treatment to help children reach their full potential.

BROOKS REHABILITATION HOSPITAL

Our 160-bed physical rehabilitation hospital is the only one of its kind in the region. As a Center of Excellence, Brooks Rehabilitation Hospital is accredited by the Commission for the Accreditation of Rehabilitation Facilities (CARF) and is recognized as a specialty program for brain injury.

3599 University Blvd. S., Jacksonville, FL 32216 • (904) 345-7600

BROOKS OUTPATIENT REHABILITATION

Our outpatient program provides a multi-disciplinary, research-based approach offering physical, occupational and speech therapies.

Multiple Locations • (888) 323-8005

BROOKS SCHOOL RE-ENTRY PROGRAM (BSRP)

The BSRP provides a continuum of school transition and support services for children and adolescents at Brooks Rehabilitation Hospital and Brooks' outpatient clinics. Brooks School Re-entry specialists strive to ensure parents and schools have the information and support needed to maximize a child's school success.

(904) 345-7218 • SchoolReentry@brooksrehab.org

BROOKS PEDIATRIC RECREATION PROGRAM

The Brooks Pediatric Recreation program provides a safe and supportive environment for youth with physical and/or developmental disabilities. With a focus on a healthy lifestyle, youth can engage in activities that promote fitness, socialization, enrichment and independence. Classes and events are free for families and provided year round across Northeast Florida.

NEURO RECOVERY CENTERS (NRC)

The NRCs offer specialized equipment for customized rehabilitation during your formal therapy or after your traditional therapy has been completed.

3599 University Blvd. S., Jacksonville, FL 32216 • (904) 345-6812
500 Park Ave., Orange Park, FL 32073 • (904) 278-7890

BROOKS MOTION ANALYSIS CENTER (MAC)

The MAC uses infrared cameras and a motion capture system to assess movement disorders and analyze muscle activity. This innovative technology supports advanced therapeutic treatment of patients and well as clinical research.

3901 University Blvd. S., Suite #101 Jacksonville, FL 32216
(904) 345-8967

BROOKS WHEELCHAIR CLINIC

A specially-trained assistive technology therapist performs a comprehensive wheelchair evaluation including pressure mapping to customize a chair to each individual patient.

3599 University Blvd. S., Jacksonville, FL 32216 • (904) 345-7646

PEDIATRIC PROGRAM

BROOKS[®]
Rehabilitation

The expertise to help kids reach their full potential.

Brooks Rehabilitation has been an industry leader in rehabilitation for almost 50 years. Our expanded continuum of care supports children and families along their journey in the setting most appropriate for their needs. The pediatric team has specialized training and the unique skills to address everything from developmental disabilities to traumatic injuries from infancy to adulthood.

MULTIPLE LEVELS OF CARE

The Brooks Pediatric Program provides services to children with any limitation or disability at any age. We help to restore function, increase independence and improve quality of life.

Brooks Rehabilitation Hospital combines state-of-the-art equipment with a playful environment in our colorful children's wing. Our holistic support includes medical care, therapy services, transitional school services, recreation and outings. Parents are encouraged to stay with their child throughout their treatment stay so our rooms feature a pull-out couch and family space to play games as you would in your own home.

Brooks Outpatient Rehabilitation has an extensive network of pediatric clinics, offering multi-disciplinary services (occupational therapy, physical therapy, speech-language pathology). Our patients may have diagnosed conditions such as cerebral palsy, spina bifida and autism spectrum disorder, as well as general developmental delays and undiagnosed limitations in communication or mobility.

Specialty clinics like the Motion Analysis Center, Neuro Recovery Centers (NRC) and the Wheelchair Clinic use the latest technology to maximize a child's recovery. The NRCs offer the latest technology to help kids improve their balance and coordination. Our Motion Analysis Center uses infra-red laser technology to help therapists better understand how muscle and joint activity impacts physical movement.

Our Pediatric PROGRAM

Has a full complement of disciplines including:

Nursing • Physical therapy • Occupational therapy
Respiratory • Speech-Language Pathology • Dietary
Recreational Therapy • Cognitive Rehabilitation
Neuropsychology • Physiatrists, physicians who specialize in physical medicine and rehabilitation

A child's world extends beyond the walls of a hospital or clinic. Brooks is committed to supporting children and families through a variety of FREE community programs.

- Developmental screenings are provided at all pediatric outpatient clinics for children ages one month-5 years old.
- Our School Re-entry program is unique to Brooks and supports children's educational needs, from birth to college.
- Our Pediatric Recreation program provides a safe and supportive environment for youth with physical and/or developmental disabilities. With year round sports, classes and events, children from birth to 17 years old can engage in recreational activities alongside their peers.
- Brooks' ThinkFirst chapter provides education on prevention of brain and spinal cord injuries to classrooms, summer camps and community fairs along with helmet fittings to help children protect their brain and "Think first!"

PEDIATRIC RESIDENCY PROGRAM

Through the Brooks Institute of Higher Learning (IHL), we offer a Pediatric Physical Therapy Residency Program that continues education and training to the highest level in the profession. The residency is a one-year program that incorporates vigorous class study, clinical mentoring and supervision, and other directed learning activities. The program prepares residents to successfully become Board-Certified in Pediatrics, which means your child receives the best care possible.
