Health Priority - Physical Activity

Goal: Encourage people with disabilities to adopt a healthy, active lifestyle.

Objective: By 2015, increase the number of sports, recreation and exercise activities each program participant attends by 10%.

Strategy: Provide adaptive sports and recreation activities to the community through Brooks Adaptive Sports and Recreation Program

Strategy: Provide an exercise component to Brooks Brain Injury Clubhouse program

Includes: Regular exercise classes during the program day, Transport members to special YMCA activities

Strategy: Provide a Stroke Wellness Program that includes regular exercise opportunities with specialized equipment for Stroke survivors in the community

Process Evaluation/Measure of Success
Each member and their attendance at activities will be tracked through Shape.net, a data base that records individual participation in program activities.

Health Priority – Stroke

Goal: Provide stroke survivors the benefits of an active lifestyle through our Stroke Wellness Program which has secondary benefits of decreased falls, prevention of 2nd stroke, increased mobility, weight control, and better mental health.

Objective: By 2015, increase the number of people who are served through our stroke wellness programs by 100%.

Strategy: Community Education Activities including annual Celebrate Independence event, presentations by stroke staff members at various community events and health fairs

Strategy: Recommendations for participation in Stroke Wellness program by patient discharge planning team

Strategy: Promote referrals from area healthcare professionals

Strategy: Identify prospective participants through Caretracker program that follows high risk stroke survivors post discharge.

Process Evaluation/Measure of Success:
Record the level of participation.
Health Priority – Mental Health/Depression

Goal: Improve quality of life for people living with disabilities.

Objectives: Improve the quality of life for people with disabilities who participate in Brooks community based programs. Specifics will be developed when Quality of Life measurement tool has been determined.

Evaluation Process/Measure of Success:
Track the number of unique members and the number of times each person attends an activity through Shape.net database.
Adaptive Sports and Recreation

The Brooks Adaptive Sports and Recreation Program enables those living with a physical disability to enhance their quality of life through participation in sports and recreational activities. Activities include: Adaptive Rugby, Adaptive Rowing, Adaptive Surfing, Horseback Riding, Adaptive Tennis, Adaptive Golf, Handcycling, Wheelchair Basketball, Adaptive Waterskiing and other recreational activities. Individuals may participate at a competitive or recreational level. Equipment and expert instruction are provided at no cost to the individual. The mission is to provide the inspiration, education and opportunity to participate. The overall program goal is to enable a higher quality of life as evidenced by enhanced physical, emotional, and social health and well-being.

Brooks Clubhouse

The Brooks Clubhouse is a full-time day program that provides for the long-term recovery needs of individuals who have suffered from an acquired neurological injury. It expands the continuum of care provided by Brooks Rehabilitation and serves as a bridge to community and vocational re-integration. Brooks is pleased to offer the only clubhouse program for people with an acquired brain injury in the state of Florida. The program follows the guidelines established by the International Center for Clubhouse Development (ICCD). Membership is available to any adult, age 16 or older, who would benefit from activities to enhance social, physical, cognitive and vocational outcome following an acquired brain injury. This includes individuals with a diagnosis of traumatic brain injury, stroke, anoxia, or other acquired central nervous system dysfunction.
**Stroke Wellness**

The Brooks Stroke Wellness program is a partnership between Brooks, the YMCA and Halifax Medical Center. The Stroke Wellness Program provides patients with customized exercise programs and nutrition education to support the goal of restoring strength, endurance and agility after a stroke. Designed by the Brooks team of stroke experts, this program is the only one of its kind in Northeast Florida. Under the guidance of your Brooks physical therapist and the Stroke Wellness Program staff, participants are evaluated and provided with their own personal fitness plan, which is designed to start with their current abilities and gradually change as strength and endurance improves.

---

**Celebrate Independence**

Since 1991 Brooks Rehabilitation has been Celebrating Independence through it’s annual free, community-wide event honoring the spirit and accomplishments of people with disabilities. This event commemorates individual and community accomplishments, honors those making a difference in the lives of persons with disabilities, and raises general awareness of the issues in our area. The event includes informational exhibitions centered on recreational, cultural, physiological and physical opportunities that can further recovery and improve quality of life for those with disabilities.
