

STROKE Beyond Recovery

Brooks has the experience and experts to help stroke survivors recover.

Brooks provides more specialized, focused stroke rehabilitation than others offering the most innovative, scientifically supported treatments available.

Patients are offered the newest, state-of-the-art equipment and innovative technology with proven outcomes for stroke survivors.

As a research entity studying stroke recovery, Brooks helps determine the best treatment techniques.

We offer a full system of care—from inpatient to outpatient to post-rehabilitation exercise—to meet each patient’s needs at all stages of recovery.
