Why Send Your Injured Worker to Brooks Rehabilitation?

Brooks Rehabilitation offers a complete continuum of care for your injured worker. Brooks has the experience and expertise to support the needs of injured workers, regardless of their complexity.

By offering a complete continuum of care, our dedicated Workers' Compensation Specialists ensure injured workers achieve the highest level of function possible.

The workers' compensation program covers a variety of service areas, including:

Inpatient Rehabilitation

- Brain Injury
- Amputee Program
- Disorders of Consciousness Program
- Spinal Cord Injury
- Chronic pain, including opioid wean
- Major multiple trauma
- Physician consultations available, regardless of location
- Single point of contact via a Workers' Comp Care Specialist
- Ventilator unit and diaphragmatic pacing system program
- Helen's House - A nonprofit hospitality house offering affordable temporary lodging to patients and their caregivers

Two rehabilitation hospitals in Jacksonville, Fla. and one in partnership with Halifax Health in Daytona Beach, Fla.

Outpatient Rehabilitation

- More than 40 locations throughout North and Central Florida
- Skilled physical, occupational and speech therapy
- Residency and fellowship-trained clinicians
- Certified Functional Capacity Evaluator (CFCE)
- Certified driving rehabilitation specialist
- Psychological and neuropsychological services

Physician Practice

- More than 15 physiatrists, board certified in physical medicine and rehabilitation, plus one optometrist specializing in low vision and physician assistants and advanced nurse practitioners to care for patients in all settings
- Specialized medical directors for traumatic brain injury, spinal cord injury and medically complex, including orthopedic and amputee rehabilitation

Specialized Programs & Services

- **Spinal Cord Injury Day Treatment Program:** An outpatient interdisciplinary rehabilitation program designed to provide intense therapy for patients who have had a spinal cord injury (SCI) or similar neurologic disorders.
- **Amputee Program:** Our team treats people of all ages who have suffered an amputation.
- **Cyberdyne Hybrid Assisted Limb technology:** The only US-based facility offering CYBERDYNE's Medical Hybrid Assistive Limb (HAL) technology to those with a spinal cord injury. HAL is the world's first robotic medical device proven to improve a patient's ability to walk.
- **Neuro Recovery Centers:** State-of-the-art rehabilitation centers featuring advanced equipment and technology to benefit individuals with neurological injuries or illnesses.
- **Brain Injury Day Treatment Program:** A program to help individuals with acquired brain injury regain independence to return to work and driving while reducing attendant care.

COMPREHENSIVE FUNCTIONAL EVALUATION (CFE):

A workers' comp specific, multi-day, interdisciplinary evaluation designed to assist with case closure for complicated catastrophic cases. The CFE can help address the major cost drivers of a longstanding catastrophic case including: home attendant care, transportation needs, future rehabilitation needs and opiate medications.

Brooks offers skilled nursing facilities (SNF) and assisted living facility (ALF) services for injured workers.
