

Creating a community of researchers, clinical professionals and patients transforming rehabilitation through innovations in science, technology and care.

The Brooks Clinical Research Center is devoted to conducting innovative research studies that will expand the knowledge and science of recovery for our patients.

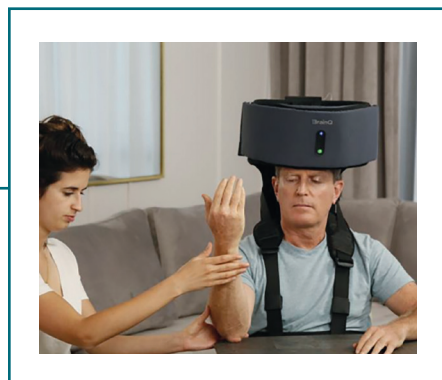

Our skilled team is driven by a mission to generate new evidence and integrate the latest research discoveries into clinical practice. Through partnerships with leading experts in academia, clinical care and industry, we offer patients and community members the opportunity to participate in research studies that tackle real world problems and aim to improve patient outcomes and quality of life.

Not only are we focused on our patients' futures – we are also focused on advancing the future of rehabilitation.

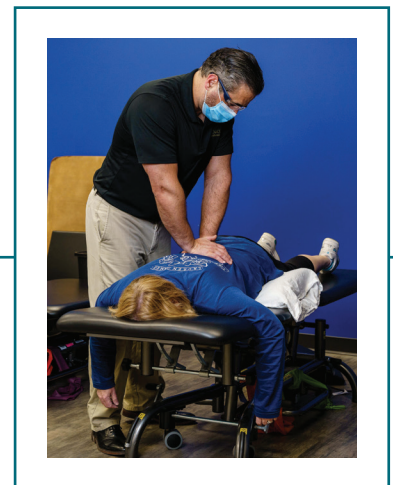

OUR AREAS OF FOCUS

Improving health, mobility, walking recovery, and breathing function following neurologic injury

Utilizing cutting-edge technologies and interventions to improve quality of care

Improving delivery of care for musculoskeletal pain and disabling conditions
