

# Up-2 Study

## RESEARCH STUDY TO “TRAIN YOUR BRAIN”!

Researchers at University of Florida and Brooks Rehabilitation are testing an experimental treatment that may improve both cognitive ability and walking ability.

### This study involves:

- **18 sessions** of walking exercise
- Mild electrical stimulation of the brain
- Tests of thinking/memory and walking ability
- Brain imaging with MRI

### You may qualify if you are:

- Age **65 or older**
- Generally healthy with no major disabling conditions
- Willing and able to travel to our research sites for exercise and testing sessions

Eligible participants are able to receive up to \$750 for completing the entire study.
